1.Executive summary

The project PMKSY WDC 2.0 has evolved with initial objectives of soil & water conservation and reducing siltation of river valley projects to the current integrated approach of managing the biological, physical and social elements in a landscape within watershed boundaries. At watershed levels, the project is aimed to achieve higher incomes for farmers, expanded livelihood options for landless, equity in distribution of benefits, community ownership and management and ecological sustainability.

With the above objectives and aims, the project has been conceptualised and has been sanctioned to the sub- watershed Belavigi during the financial year 2021-22. The sub watershed Gundagatti is 58 kms from Haveri District and 8 kms away from Hirekerur taluka Hirekerur Hobli. The project comprises the geographical area of 4411.58 ha which is further divided into 8 micro watersheds namely 4D4C5H1c,4D4C5H1e, 4D4C5H2a, 4D4C5H2b, 4D4C5H2d, 4D4C5I2g, 4D4C5L2a The total financial outlay of the project is 922.02 lakhs and the various components to be undertaken in the project along with financial allocation to each are mention in below table.

Components	Percent
1. Management cost	10%
2. Monitoring and Evaluation	2%
3. Entry Point Activity	2%
4. Detailed Project Report	1%
5. Institution Capacity Building	3%
6. Natural Resource Management	47%
7. Production System	15%
8. Natural Resource Management and Governance	2%
9. Livelihood Activities for the asset less persons and Micro enterprises & Business development	15%

The expected outcome from the project is mentioned below:

- Enhancing quality life among village community.
- Ensuring institutional support for strengthening community organisation for data collection and preparation of action plans.
- Inducing and strengthening both landless and poor landholders for income generation activities.
- Reduction of soil and water erosion and fertility improvement for crop production.
- Increasing household income of landholders through integrated farming and adoption of allied activities like, sheep/goat, poultry/rearing and vermi compost production etc.
- Improving vegetative cover for environmental protection and for fodder, fuel wood, and timber production.
- Improving ground water recharge by taking drainage line treatments.
