Department of Agriculture

KOLAR District

Watershed Development Component of Pradhan Mantri Krishi Sinchayee Yojana- WDC-PMKSY 2.0

Detailed Project Report (DPR)

Project Name : KOLAR-WDC-01/2021-22

Taluk : MULBAGAL

District : KOLAR

Details of Project Implementing Agency

PIA / Organization Name :	Assistant Director of Agriculture
Organization Type :	Government Department
Office Telephone Number:	-
Alternate Telephone Number :	-
Fax Number:	-
Official Email Id:	<u>adaofficemu@rediffmail.com</u>
Alternate Email Id	<u>jdakolar@gmail.com</u>
Contact Officer Name:	Ravi Kumar S
Contact Officer Designation	Assistant Director of Agriculture
Contact Officer Cell Number:	8277932007
State :	Karnataka
District	Kolar
Block :	Mulbagal
Selection Order Number :	
Selection Authority	
Selection Date of PIA:	
Office Address:	Office of the Assistant Director of Agriculture, Thyagaraja colony, Opp: MLA quarters, Mulbagal Town-563131

1.Executive summary (one page about the project)

Introduction: Kolar district situated in the south eastern part of the state with GPS 12'46'to 13'58' North latitude and 77'22' to 78'35' East Longitude. The district comes under eastern dry zone of the agro climatic zones of the state.

The district has 726 microwatersheds covering an area of 374966.00 ha so far 489 microwatershed covering an area of 243797.22 ha have been treated under various schemes.

The district has a semi arid and sub tropical climate with mild winter and severe summer and normal rainfall is 724 mm which is received in 49 rainy days during south west monsoon from June to September. But distribution of rainfall and intensity is erratic resulting in frequent and consecutive drought and scarcity condition.

The district has no perennial rivers, the Palar and Pannar river basin are completely dried up. The farmers completely depend upon ground water for growing irrigated crops with about 81837 number of borewells. The ground water is over exploited and ground water depth has gone upto 1500 to 1000 ft. Hence all the taluk of the district are classified as over exploited blocks.

The district has a total geographical area of 374916.00 ha out of which 170591.00 ha (45.50%) of area is cultivated. Further only 16% of this cultivated area is double cropped. The forest area in the district is 50834.00 ha (13.50%)

The District is predominantly dependent on rainfed agriculture. Since there is no perennial source of irrigation facilities the cropping is mainly confined to kharif season with ragi, ground nut, redgram, field bean and horse gram as major crops. Horticulture sericulture and dairy production are the allied activities taken up in the district.

In the project area the forest constituent only 189 ha (5.54%) of the total project area in the absence of a forest canopy proper vegetation ground surface has no adequate soil or organic humus. This inadequate green cover leads to sheet and gully erosion in the project area.

In the project area drought occurs as a common phenomenon as a result of vagaries of monsoon like inadequate and ill distributed rainfall and frequent dry spells affecting the crop production and productivity. Drought on one side and gradual degradation of land by continuous erosion of soil together have been responsible for faster deterioration of productive capacities of the soil leading to wider fluctuations in total production and productivity of both agriculture and horticulture crops. In order to check further degradation and to sustain productive levels in the agro-system for improving the livelihood of the farming community in the project area the only effective method is through integrated watershed management through ridge to valley adopting watershed management concept involving stakeholders of each and every land parcel of the watershed area. Hence implementation of PMKSY-WDC 2.00 scheme in the project area will be the need of the hour for the block and for the district.

1.Introduction and General description about project area

Kolar district situated in the south eastern part of the state with GPS
