**Watershed Development Component of Pradhan Mantri Krishi Sinchayee Yojana- WDC-
PMKSY 2.0
Detailed Project Report (DPR)**

Project Name : Raichur-WDC-01/2021-22

Taluk : Raichur

District : Raichur

Evolution of Watershed Development

Watershed development approach has evolved with passage of time gradually from initial objective of soil and water conservation and reducing siltation of river valley projects to the current integrated approach of managing the biological, physical, and social elements in landscape within a watershed's boundaries. Climatic change issues and its impacts witnessed in the recent past have adversely impacted ecology in general and agricultural production systems in particular, posing grave challenges to sustainable livelihoods, especially for vast majority of people in India who are directly or indirectly dependent on agriculture.

A considerable percentage of India's agricultural production system is rain fed. Over the last 25 years of engagement with watershed development approach, the country now possesses a treasure of diverse learning and improved management capacity.

Investments made in watershed development programmes, like Integrated Watershed Management Program (IWMP), externally funded programmes, and other natural resources management programs such as Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS), Rashtriya Krishi Vikas Yojana (RKVY) etc., have demonstrated reasonable success.

Objectives of Watershed Development Projects

At watershed level, the development plan shall be guided by the need to achieve higher incomes for farmers, expanded livelihood option for landless, equity in distribution of benefits, community ownership and management, and ecologically sustainable action plan.

Enhancing economic growth of village community dependent on watershed by:

- a) Securing production and farmers' income against climatic variability and its risks of drought spells through diversification of crop systems and animal husbandry, and varied livelihood portfolios; efficient water harvesting and retention of rainwater in soil profile; and entitling all project members to ground and surface water resources for life saving irrigation on equitable basis.
- b) Improving intensity and productivity of various crops, livestock's, fisheries, and biomass production systems through optimal, integrated, sustainable and efficient use of natural resources in project areas.
- c) Recognising the status of non land holding project members, and promoting alternate livelihood opportunities.
- d) Building an ecosystem of enterprises for facilitating efficient scales of operations, access to credit, and market linkages; knowledge sharing; and resource convergence led by vibrant member managed farmers' institutions.

Ecological restoration and sustainable management of natural resources across the project area through:

- a) Sustained community action in management of natural resources/assets such as groundwater, soil, community resources, etc., by way of building community organisations like User Group (UG), and transferring maintenance responsibilities to them. Further, supporting UGs with regulatory norms, that are institutionalized through the Gram Panchayats.
- b) Promotion of simple, easy to use and affordable technologies and practices, that builds upon local knowledge and available materials.

Improving the economic and social conditions of the resource poor, asset-less, differently-abled and women in particular through:

- a) Shared and equitable access to the land, water and biomass resources developed.
- b) Greater access to income generating opportunities.
- c) Facilitating co-option of members of these categories in various community institutions i.e. FPO, User Groups etc.

1.Introduction and General description about project area

S. No.	Proposed Microwatershed code (8 digit code)	Name of the GPs covered	Name of the Villages under each GP	Geographical Area of the village	Total Reserved forest area	Project area (7=5-6)	Total untreatable area (area under assured irrigation, & uncultivable waste land and habitations)	Total treatable wasteland area (ha.)	Total rainfed agricultural area (ha.)	Total area proposed for treatment (11= 9+10 or 11= 7-8)	Forest area taken up for development out of column 11 (ha)

7	Yaklaspur	0	_	ECO_Fin_Pro_AD	0	0	0	0
Project Grand Total					45	15	30	45

Nature of Right :

F --->for right to fishing [culture,harvest and sale]

Fw -->for right to collect firewood for domestic purposes

G --->for right to grazing for cattle

MFP ->for right to collect and sell minor forest produces

P --->for right to passage across the CPR

Rd -->for right to construct a road for access to individual property

S/M ->for right to collect and sell Sand and Minerals

So -->for right to collect soil for nursery and plantation activities and construction

T--->for right to collect timber for construction of house

Wd -->for right to collect/use water for drinking

Wi -->for right to use water for irrigation
